SPEED OF DESTROYERS TWENTY-EIGHT KNOTS ALL OLD OFFICERS

Some Naval Officers Think Department is Making Mistake in

WASHINGTON, Nov. 26 .- There is still much discussion in the navy department concerning the speed of the new destroyers, plans for which are now before the naval board on construction.

It has been pratically decided to limit the speed of these boats to twenty-eight knots, a proposition which finds little favor among some of the naval officers, who believe that the latest destroyers should have YORK, who believe a speed at least destroyers wholed have a speed at least equal to that of the destroyers which are being designed and some of which are being completed abroad.

Alientical

Attention is called to the facthat the British navy will soon have destroyers of a speed of about thirty five or thirty-six knots, which give: them a substantial advantage over destroyers which have considerably less than thirty knots of speed. Of course, with every new knot of speed there must be additional weight of machinery, calling for reduction in other departments, and a decision to build destroyers of less than thirty knots speed would give such destroyers characteristics that are probably not possessed by the thirty-five knot boats, but some of the experts in the navy department maintain that in the case of torpedo craft speed is the essential characteristic which should not be ignored by any means. a substantial advantage ove

THE "HOLY HOUSE."

legend. At Nazareth was preserved with pious care the house of Our Lady. The dwelling place in which Lady. she received the gracious message of the incarnation, the lowly home which sheltered the holy family for so many years, was a very precious sanctuary. On May 10, 1291, a month after the taking of Tripoli and Ptolemais, this holy house was carried by the hands of angels from Nazareth to a place in Dalmatia between Flume and Tersatz on the Adriatic shore.

It was a one roomed edifice, built of red square stones, fastened with co-ment, and bore proof of age and ori-ental design. It stood without any foundations and had a wooden deco rated celling. The walls were covered with frescoes; there were a door and a narrow window; inside were an altar of stone, an ancient crucifix, a small cupboard, containing sels of common use; a chimney and hearth, above which was a cedar statue of Our Lady with the Holy Chifa in her arms: The pastor of the place learned in a vision that the building was the house of Our Lady, the stone altar that at which St. Peter celebrated mass and the statue the work of St. Luke the Evangelist, In proof of the vision he was cured of a responsible persons forthwith were sent to Nazareth to investigate the mystery, and they found that the

house was no longer to be found.

Measurement and other means taken proved that the house that had suddenly appeared in Dalmatia deed none other than that which had as suddenly left Palestine. Three years after, on Dec. 10, 1294, the holy house again disappeard and under the pontificate of Celestine V, came to Recanati, a little town in the march of Ancona, when it fixed itself in a of Ancons, when it fixed itself in a laurel grove belonging to a plous lady called Loreto. It was discovered by some shepherds and soon became recognized and was benceforth a much frequented place of pligrimage. Eight months afterward the house removed to a small hill, three miles from Re-canati, to land belonging to two brothers, who, however, fell out shortly aft-erward over the division of wealth which began to flow to the new shrine.

To save strife between the brothers the house was suddenly lifted once more and this time settled down finally in the midst of the public way, which had to be diverted in conse

MEN ARE POWERLESS

Fight Against Disease Unless They Strike at the Underlying Cause.

Strike at the Underlying Cause.

To treat Dandruff, and Falling Hair, with irritants or oils on which a parasitle germ will prosper, is like accoping water from the ocean to prevent the tide from rising.

You cannot accomplish a satisfactory, sure without having a right understanding of the fundamental causes of the trouble.

You must kill the Dandruff Germ.

Newbro's Herpleide does this because it is specially made to do that very thing.

When the germ is removed, the hair has no choice but to resume healthy growth and beauty.

"Destroy the cause, you remove the effect."
